Hiring Team

Beanstalk

Singapore

Dear Hiring Team,

I am writing to express my strong interest in the **Business Analyst (Part-Time)** role at Beanstalk. With a background in computer science, a keen interest in sustainable innovation, and experience working on strategic, data-driven projects, I am excited by the opportunity to contribute to Beanstalk's mission of transforming global agrifood systems through innovation and impact.

Currently pursuing a BSc (Hons) in Computer Science at the University of Staffordshire, I've applied analytical thinking and digital tools in projects that blend strategy, technology, and real-world problem-solving. From building scalable frontend interfaces using React and Next.js to designing dashboards for insight generation, I've learned to synthesize complex data into actionable insights. I'm confident these skills will directly support Beanstalk's advisory and venture-building efforts — whether it's mapping agtech ecosystems or developing early-stage business models.

What resonates most with me about Beanstalk is your commitment to enabling circular, nature-positive, and secure food systems across the Indo-Pacific. Having grown up in Sri Lanka — a country rich in agriculture but vulnerable to climate pressures — I deeply understand the need for resilient innovation at the intersection of environment, livelihood, and technology. I am eager to support Beanstalk's client delivery and internal initiatives with thoughtful research, creative problem-solving, and a genuine curiosity for agrifood transformation.

I am confident that my cross-functional capabilities, proactive mindset, and dedication to impactful work make me a strong candidate for this role. I would be honored to contribute to your team's vision and grow within an organization that values innovation, sustainability, and inclusive growth.

Thank you for considering my application. I look forward to the opportunity to speak further.

Warm regards,

Anuda Ranasinghe
